-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the sorber device of Marek (2,450,289), wherein main tank (holder 12) is filled with a solid sorbent powder 13 that is arranged around heat exchange finned tubes 14 and is covered by screens or foraminous plates 15 and 16, which finned tubes 14 have fins 14A that carry heat from a heat transfer material, and would also restrict any movement of the powder sorbent material in a parallel direction to such fins because of such parallel construction.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Marek (2,450,289) in view of Klos et al. (6,432,176). The claim differs from the structure of Marek ('289) in the sorbent material being capable of sorbing hydrogen. Klos et al. ('176) show a container containing hydrogen sorbing alloy, with such container including heat exchange means. It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to utilize a hydrogen sorbing material within the

Art Unit: 1724

container of Marek ('289), in view of the showing of Klos et al. ('176), when it is desired to sorb hydrogen in place of oxygen within the container.

5. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The remaining references listed on both the PTO-1449 and the PTO-892 show art of interest.

7. Applicants' response to this Office action must also include the following editorial changes: page 8, line 14, "a" should be deleted; page 8, line 24, "intends" should be "intend"; page 10, line 6, "another" should be "other"; page 10, line 6, "The" should be "the"; page 10, lines 21 and 22, "a" should be deleted; page 11, line 6, "portion" should be "portions"; page 12, line 7, "being" should be "in"; page 13, line 21, "a" should be deleted; page 13, line 22, the second occurrence of "a" should be deleted; page 31, line 17, "filed" should be "filled"; and, page 36 (abstract), lines 6 and 7, "a" should be deleted.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert H. Spitzer whose telephone number is (571) 272-1167. The examiner can normally be reached on Monday-Thursday from (5:30AM-4:00PM).
